

## Documentation about GenZ team

---

### Design of project:

1. We tried to create a website like “مستقل”, “خمسات” in terms of offering jobs and services
2. We don't use any Front-end framework in our website

### Write the code:

1. We followed Dr. Ahmed's method to write our code and his videos
2. We used OOP
3. We made the Functions like “register, login, store project, edit, project, ....”
4. We made the filtration, validation and authentication.

### Setup instruction:

1. Must execute the database to attraction with back-end and website.
2. Install xampp

### Usage guidelines:

1. Open Xampp
2. Open SQL and Apache
3. Access to folder from it
4. Make a new user
5. Login with this user
6. Start to show your work or hiring some people.
7. Enjoy with our humble page 😊

ملحوظه:

والله يادكتور كنت اتمنى اسلم حضرتك المشروع كامل بس التيم مش مساعد.....
